

Cut around the image. Lay flat on a surface. Fold the upper part of the cut-out up and down, making a sharp crease between the **A** arrows. Flatten out. Fold and crease the cut-out at the **B** arrows. Flatten out.

Use sticky tape or leave tabs to join the cut-out at the brackets. Finally tape the ridge to leave the long sides parallel.

The Glasshouse should conform, more-or-less to this shape.
